

January 21, 2015

Louisiana Controls, Inc. provided and installed a Schneider Electric I/A Series energy management system during the construction phase of our facility in 2006. Since then, we have extended and modified our existing system into an expansion project, which was completed in 2012. We currently have a service contract with Louisiana Controls and find their services very beneficial and we would highly recommend this company to others.

Sincerely,

A handwritten signature in black ink, appearing to read "Scott Blank", is written over a faint horizontal line.
